

SP01-002/SP01-003

Anti-Vibration Mount Adapter

FOR USE WITH SPECTRA® IV SERIES DOMES

Product Features

- Standard and Heavy Duty Models Available
- Designed for Extreme Vibration Applications
- Reduces Vibrations from Roof-Mounted A/C Units, Heavy Equipment, and Large Compressors (Not Guaranteed to Eliminate All Vibration)
- Light Gray Powder Coat
- Mounts to Any Spectra® Series Mount with 1.5-Inch NPT Threads
- Ideal for Use in Outdoor Installations

Description

The **SP01-002/SP01-003** are anti-vibration mount adapters designed for use with a variety of Spectra® IV Series pendant dome systems: **SP01-002** is for use with Spectra IV Series standard and environmental pendant dome systems; **SP01-003** is for use with Spectra IV Series pressurized, heavy duty, stainless steel, and Spectra IV SE Horizon Series pendant dome systems. The mount adapters are designed for extreme vibration applications where external sources (for example, roof-mounted A/C unit, heavy equipment, or large compressor) interfere with the video of the dome system. The **SP01-002/SP01-003** reduces external vibrations by isolating the Spectra IV Series dome system from the source of the vibration.

The **SP01-002/SP01-003** mounts between the Spectra IV Series pendant back box and any Spectra Series mount with 1.5-inch NPT threads.

SP DISCLAIMER

SP products carry a 90-day warranty and are not returnable. SP products do not carry any agency certifications. Pelco strongly encourages installers to strictly follow local codes and regulations governing the installation of video security equipment and therefore assumes no liability for the installation of products depicted herein.
