

## Special Modification Request “SMR Of The Week” EH20 Traffic Pole Mount

[David Marin](#), Sr. Manager- SMRs

Mounting an EH20 housing to horizontal traffic poles can be accomplished with this SMR solution.

Part number SM-EM20-3593, SMR 2-003593, is a great solution.

Articulating the housing into various angles for the most difficult traffic arm mounting challenges can be accomplished with replacing the EM20 mount with this SMR product. Sold separately is the standard EH20 enclosure.

The mount comes with three stainless steel pole straps, and we have another SMR offer that provides two U-Bolts instead of the straps.
