

## Special Modification Request “SMR Of the Week” Fortified Housing

David Marin, Sr. Manager- SMRs

### [Fortified Series High-Temperature Camera Systems.](#)

SMR 2-003432 provides the Fortified Housing with third or future-generation IXE or IXP cameras, lenses, and optional media converter. Several combinations can be configured to meet any requirements.

IP66 with active cooling technology and is dust- and water-tight. The enclosures house one of several camera options. The Fortified Housing Series is ideal for installations in high-temperature environments. Pelco IP camera systems can be configured with an optional fiber optic media converter. The fiber media converter uses FSFP technology to give the installer the choice of many fiber media formats from single mode to multimode.

Each system includes a camera and lens. Please contact the SMR department for any configurations that are needed.
