Smart Analytic Event: Pelco Smart Analytics, powered by Motorola Solutions, delivers higher accuracy, detection, and classification of people to increase productivity by expediting real-time response.

¹ Requires firmware 3.9.0.8 or later to support overlays

² Radiometric models also include analytic events for Temperature Change and Temperature Threshold.

Advanced Analytics Event: Leverages AI-powered algorithms to detect threats immediately in critical situations. Includes features from Enhanced Analytics with MSI object based detection and classification of people and vehicles. Offers Pelco DL6 behaviors and Pelco Advanced Metadata stream.

Object Bounding Box: Currently only includes bounding box overlays to highlight detected objects in live or recorded video.

Enhanced Analytics Event: Provides basic analytics like the Pro Analytics with a PTZ camera tracking and Pelco camera link.

Pro Analytics Event: Offers basic analytics such as loitering, simple line counting, etc.
