Courses Available

- VideoXpert Operator and Administrator Certification
- VideoXpert Professional Certification
- VideoXpert Enterprise Certification

The security industry is evolving, and increasing requirements for higher levels of complexity in video security systems can be challenging to our Partners. To minimize this burden, Pelco training offers solutions including Instructor-Led and Online courses. Pelco trainers are highly qualified technical professionals, bringing years of troubleshooting, real world application, and training experience to you. Many of the courses are lab oriented which offers a high quality, hands-on experience using the latest Pelco equipment.

VideoXpert Operator and Administrator Certification

Instructor-Led Course (P-501-IL) | Online Course (P-501-V)

This certification is intended for operators and administrators of the VideoXpert system. The course is designed to allow a student to comfortably operate the system in a single location environment. Participants that attend the in-class course (8 Hours over one day) will complete hands-on lab work to assess practical experience. Participants that attend the virtual classroom (8 Hours over two days) will complete activities online and an active internet connection is required.

VideoXpert Professional Certification

Instructor-Led Course (P-502-IL) | Online Course (P-502-V)

This certification is designed to enable learners to install and operate a VideoXpert Professional system in a single-location environment. This course provides learners with the knowledge and skills to set up, configure, and operate the system. Participants that attend the in-class course (12 Hours over one and a half days) will engage with hands on lab work to assess practical experience. Participants that attend the virtual classroom (12 Hours over three days) will complete activities online and an active internet connection is required.

VideoXpert Enterprise Certification

Instructor-Led Course (P-500-IL) | Online Course (P-500-V)

This certification introduces enterprise-level software, enabling the participant to understand the capabilities and functionality of the software and to install, configure, and operate a VideoXpert Enterprise solution. This course overviews commissioning, administration, and operations.

Participants that attend the in-class course (16 Hours over two days) will complete lab activities on a live Pelco VideoXpert Enterprise system. Participants that attend the virtual classroom (12 Hours over four days) will complete activities online and an active internet connection is required.

TRAINING SERVICES

Additional Information

To access the Training Center to enroll into either a Instructor-Led or Online course a Pelco Support Community account will be required. To register for an account please visit <https://support.pelco.com> and then select "Log In". You will reach a page that allows you to enter your login credentials, if you need to register for an account select "Not a Member?" and proceed through the registration process.

To log in with your created account return to the page mentioned in the steps above. If you have an account but have forgotten your login credentials please select "Forgot your password?" and fill out the field to receive instructions on how to reset your account credentials

On-Site Training

On-site training is an available service offered at additional cost.
