### Solutions for Camera Link Mounting Multiple Cameras – Multiple Options

Double or Triple Retrofit Arm  
Double Part Number SM-DBLB-41H8S  
Triple Part Number SM-TRLB-2BTOT0

Dual Camera on PP mount  
Part Number SM-PP450-N9LN

SMR 1-18A3DL

We have solutions for customers with mounting challenges.

A variety of SMR offers can fulfill applications where customers require multiple cameras. We have dozens of different designs that will solve almost every challenge. For example, if a customer has an existing parapet/rooftop mount, it can be retrofit to a

double or triple arm. Applications such as ports or corrections that require the simultaneous viewing of multiple zones can utilize this mount for up to six cameras. Another popular application is to install a panoramic camera for situational awareness and a PTZ on the same mount.

If mounting cameras are the challenge, then SMR designs are the solution.
