

Product at a Glance

- Up to 130dB WDR
- Low light down to 0.03 LUX
- Full HD 1080p at 30 FPS
- Easy to drive, low latency PTZ
- Tilt range up to +36° above horizon
- Full suite of analytics behaviors

Esprit™ Enhanced positioning systems bring together the very best in enclosure design, PTZ mechanics, and IP video technologies to produce the industry's leading high-definition, high-speed camera system. With 30X Optical Zoom, optional window wiper, and a very responsive, full 360° pan and +36 to -85° tilt from horizontal, Esprit Enhanced is an ideal solution when rugged environmental performance and excellent image quality are mission critical.

Applications

- Traffic Monitoring
- City Center Surveillance
- Airports & Seaports Environments
- Heavy Commercial & Industrial

All Esprit Enhanced cameras integrate with Pelco and major third-party video management systems through the Pelco API and ONVIF™ Profile S.

Choose with Confidence.

Pelco's iconic Esprit Series positioning system provides best-in-class image quality and pan/tilt performance. In addition to Full HD 1080p 30x optical zoom, Esprit Enhanced now features SureVision™ 3.0 with 130dB of True Wide Dynamic Range and low light performance up to twenty times better than the previously available Esprit HD cameras. The new SureVision 3.0 camera is available in either a standard or pressurized 30x optical zoom module that delivers market leading image quality for the toughest outdoor environments.

Esprit Enhanced features 1080p at 30 (ips) and 2.0 megapixel (MPx), 30X optical zoom, 12X digital zoom, and up to 130dB wide dynamic range. All optimized through flat glass optics, providing increased picture performance and allowing for wiper action. This industry-leading integrated package offers responsive, high-definition, high-speed positioning capabilities, outstanding weather protection, and ease-of-installation that remains unmatched in video security.

Esprit Enhanced is an ideal solution when rugged environmental performance and excellent image quality are mission critical.

Features:

- SureVision 3.0 Technology, Including:
 - Up to 130 dB Wide Dynamic Range (WDR)
 - Low Light Down to 0.03 LUX on Select Models
 - Anti-Bloom Technology
